Where Human Capital Meets Data Intelligence

Post Graduate Certificate Programme in Advanced

HR Analytics

7 Months | Online | Industry-Driven Curriculum

*Empowering HR leaders to make evidence-based people decisions using **analytics, AI and GenAI***

From Metrics to Meaning in HR

HR is evolving. Organisations now expect professionals to derive insight from data, anticipate workforce trends, and influence business outcomes. Yet most HR teams still operate on fragmented metrics — where data exists, but authority does not.

Key Questions Shaping the Future of Work

Which roles are critical to growth — and which can be redeployed?

Who is likely to leave, and what interventions will retain them?

Which initiatives genuinely improve engagement and performance?

How do workforce decisions influence revenue, risk, and organisational capability?

Answering these questions requires more than experience. **It demands advanced analytics, AI, and GenAI, applied with judgement and strategic context.**

The Shift is Real

70% of organisations expect HR to guide business decisions using data (Deloitte Human Capital Trends, 2024)

80% of HR leaders identify AI and analytics as central to workforce strategy (Gartner, 2023)

16% of HR professionals — a significant minority — are able to make data-backed recommendations (LinkedIn Workplace Learning Report, 2023)

These numbers point to a widening gap. While organisations expect HR to lead with data, analytics, and AI, few professionals feel equipped to translate insight into confident decisions. Data is no longer the differentiator — judgement is. The future of HR belongs to those who can turn metrics into meaning and influence outcomes where it matters most.

Analytics at the Helm of HR

As HR evolves, professionals must move from reactive reporting to proactive, analytics-driven decision-making, leveraging AI, data, and advanced analytics to shape workforce outcomes.

The Post Graduate Certificate Programme in Advanced HR Analytics by IIM Nagpur is designed for mid-career HR professionals seeking to translate data into strategic influence. Over 7 months of immersive online learning, participants engage in hands-on projects, applied analytics, and real-world HR scenarios, developing the skills and credibility to lead at the intersection of people and strategy.

Programme Benefits

93

hours of live online sessions

Hands-on projects solving real HR problems

07

months of immersive learning

Live weekly virtual sessions

02

day campus module for hands-on experiential learning

Advanced HR analytics with AI, ML, & predictive models

Industry-relevant curriculum aligned to strategic HR priorities

Data visualisation skills using Tableau and Excel

Executive education alumni status on completion

2 sessions on Sunday | 9:00 am - 12:15 pm

Eligibility Criteria:

Work Experience: Minimum of **2 years** of work experience

Academic Credentials: **Bachelor's degree** in any discipline, or **10+2+3 Diploma**, with 50% or above

Outcomes That Transform HR Leadership

Drive Evidence-Based Decisions:

Confidently make HR decisions backed by data and analytics

Anticipate Workforce Trends:

Spot patterns and predict challenges before they impact the organisation

Align HR with Strategy

Use analytics to connect people decisions with broader business goals

Enhance Influence:

Communicate insights persuasively to stakeholders across levels

Optimise Talent Management:

Identify opportunities for workforce planning, performance, and engagement improvements

Lead Analytics Initiatives:

Champion data-driven HR projects that create measurable organisational impact

Building Expertise, Module by Module

Module 1: Foundations of Strategic HR Analytics

- Understand the domain of HR analytics and its application in modern organisations.
- Align HR Analytics to Organisational Goals, Objectives and HR Strategy
- Explore the HR analytics continuum and its impact on decision-making.
- Understand the basics of Excel - Structuring HR data in Excel, data cleaning, pivot tables etc.
- Introduction to Tableau - Connecting HR dataset to Tableau, Creating interactive dashboards, Filtering by department, tenure, gender, level

Module 2: Workforce Planning & Talent Analytics

- Understand and apply strategic workforce planning frameworks to identify critical roles and capability gaps.
- Forecast talent demand and supply using Excel-based trend and regression models.
- Explore the basics of Business Analytics - Descriptive Analytics including Normal Distributions; Sampling and Sampling Distributions; Hypothesis Testing (One Sample); Predictive Analytics in HR context;
- Apply prescriptive analytics techniques to address HR challenges and optimise processes.
- Evaluate recruitment effectiveness using funnel, cost, and quality-of-hire metrics.
- Assess selection processes for validity, efficiency, and adverse impact.

Module 3: Performance, Engagement & Productivity Analytics

- Explore engagement & performance linkage by understanding relevant theories and models; Engagement & Performance Metrics
- Examine the relationship between engagement drivers and performance outcomes using correlation and regression in Excel.
- Identify key predictors of high performance and productivity decline.
- Segment the workforce based on performance risk and potential.
- Analyse employee performance and potential using predictive analytics models.
- Design and implement performance management systems based on analytics insights.

Module 4: Attrition & Retention Analytics

- Understand the fundamentals of Turnover & Retention - Psychological contract; High performer vs regrettable attrition; Lifecycle approach
- Build an attrition risk identification model using Excel-based analytical techniques.
- Calculate and interpret cost-of-attrition and retention ROI.
- Distinguish between regrettable and non-regrettable attrition using data.
- Formulate targeted retention strategies based on predictive insights and scenario analysis.

Module 5: Learning & Capability Analytics

- Align learning metrics with capability-building and business performance outcomes.
- Conduct pre-post and impact analysis of L&D programmes using Excel.
- Estimate the financial and strategic ROI of capability development initiatives.
- Create skill-gap and succession-readiness dashboards for leadership decision-making using Tableau.

Module 6: Ethics and AI in HR Analytics

- Understand the Basics of AI
- Using AI for Talent Insights and Predictions, automation of routine HR functions
- Generative AI Tools in HR
- Audit HR datasets for bias in hiring, pay, and performance decisions using Excel.
- Evaluate the ethical implications of predictive modelling in employee-related decisions.
- Understand the ethical issues and biases involved in the usage of AI in HR to facilitate Ethical and Responsible Use of AI in HR

Module 7: Advanced Strategic Insights

- Apply HR Analytics in strategic contexts - Translating numbers into decisions
- Measuring Impact and ROI of HR Initiatives
- Avoiding statistical manipulation
- Construct a boardroom-ready analytics narrative that balances insight, fairness, and governance.
- HR as Business Partner

Module 8: Capstone Project

- Apply learned concepts and techniques to a real-world HR analytics project
- Collect, analyse, and interpret HR data using R, and advanced Excel
- Develop recommendations for improving HR processes and practices
- Present findings and insights using Excel and Tableau

*Curriculum matrix subject to change based on emerging industry trends and academic requirements.

From the Director's Desk, IIM Nagpur

Dr. Bhimaraya Metri

Director,
Indian Institute of Management Nagpur

I take pleasure in welcoming you to IIM Nagpur (IIMN). IIMN was established in 2015 as the first of the third generation IIMs, by the Ministry of Education, Govt. of India. Its location in Nagpur, the Orange City, makes IIMN equidistant from the major metropolises – Delhi, Chennai, Kolkata, and Mumbai – in terms of travel time by air. Since its inception, IIMN has attracted talented faculty members with commendable experience in research and teaching.

Faculty members at IIMN are engaged in management consultancy, research, training, and industry collaboration for creating and disseminating cutting-edge knowledge. Its location at the very centre of industrial activity offers IIMN a natural advantage, enabling greater connections and partnerships with businesses across sectors in SEZ and MIDC-designated zones. IIMN's unwavering focus on pioneering exceptional industry partnerships to lead the way in providing real-world experiences, prepares our programme participants for life - bringing 'corporate into classrooms' to hone relevantly skilled talent for the ever-evolving corporate world. One of the first premier institutions in the country to seamlessly make the shift from physical to online over the past year, IIMN is well-equipped to conduct Executive Education Programmes (EEPs) for executives from public and private sector undertakings. Keeping the New Education Policy (NEP) 2020, digitalisation, and lifelong learning in mind, IIMN has launched online certificate programmes for skilling-reskilling-upskilling the executives in highly specialised areas of management. We anticipate that these programmes would enable executives to fully realise the opportunities ahead in a digitally disruptive world. With its unique advantages, IIMN is an exciting place to learn, grow, and be the 'champions of change'. We welcome you to join our IIMN community of faculty, staff, students, and alumni who are shaping the future of work.

From the Dean's Desk, IIM Nagpur

Dr. Alok Kumar Singh

Dean, Executive Education

Indian Institute of Management Nagpur

In the current data-rich and information-focused business landscape, the function of Human Resources has transformed from merely supporting roles to becoming a strategic driver of organisational success. Advanced analytics, digital technologies, and data-driven decision-making have become essential for developing workforce strategies and creating lasting competitive advantages.

The **Post Graduate Certificate Programme in Advanced HR Analytics** has been carefully crafted to provide HR leaders and managers with the strategic perspective, analytical skills, and practical models needed to manage this change. The programme combines modern HR strategy with people analytics, workforce planning, talent management, and organisational effectiveness, enabling participants to make informed, data-driven choices that align with business goals.

Participants will engage with real-world cases, hands-on analytical tools, and peer learning experiences through a rigorous curriculum offered by faculty from IIM Nagpur and industry experts. The focus is on turning insights into action—connecting HR strategy with quantifiable organisational results.

We believe this programme will enable participants to emerge as strategic HR leaders capable of responsibly utilising analytics, fostering organisational change, and generating enduring value for their organisations.

Prof. Sujeet K. Sharma

Dr. Sujeet K. Sharma is Dean (Research & PhD Programmes) and Professor in the 'Decision Science & Information Systems' area at the Indian Institute of Management (IIM), Nagpur. Dr. Sharma has been teaching for more than 23 years in India, Oman, and Bahrain, giving him broad experience in teaching and interacting with students across multiple cultural and ethnic backgrounds. Before joining IIM Nagpur, Dr. Sharma worked with IIM Tiruchirappalli, Sultan Qaboos University, Oman, and Birla Institute of Technology, International Center, Bahrain.

His research interests include Blockchain, Artificial Intelligence, Social Media, Mobile Technologies, e-Services, and IT for Disaster Management. He has published 40 international journal articles with ABDC/ABS rankings. His ResearchGate score is 32.15, and Google Scholar citations stand at 10,100 (h-index: 32 and i10-index: 49). His research articles have appeared in refereed journals, including Information Systems Journal, Government Information Quarterly, Communications of AIS, Technological Forecasting & Social Change, Computers in Human Behaviour, International Journal of Information Management, Information Systems Frontiers, Behaviour & Information Technology, Journal of Computer Information Systems, Scandinavian Journal of Information Systems, and Journal of Enterprise Information Management. In addition, Dr. Sharma has presented his research at top-tier conferences held in India, the USA, the UK, Italy, Malaysia, Ghana, UAE, Oman, and Bahrain.

He worked closely with the Government of Tamil Nadu, India, to set up a research centre (Center for Applied Research in Data Science) for providing IT solutions to government services. He has completed a government-funded project (15 Lakhs) on "Common Service Centers for e-Services: Challenges and Recommendations" in Tamil Nadu.

Prof. Neha Garg

Dr. Neha Garg is an Assistant Professor in Organisational Behavior & Human Resource Management at Indian Institute of Management, Nagpur and serves as the Chairperson for the Domestic Immersion Programme.

A Fellow of Indian Institute of Management, Raipur and a UGC-NET Junior Research Fellow, she brings a strong blend of cutting-edge research and high-impact pedagogy to executive learning. She also represents IIM Nagpur as the Nodal Officer at the Bureau of Indian Standards and is a member of MSD-19 committee contributing to Sustainable Human Resource Management standards, bridging academia, policy, and industry practices.

Dr. Garg has published extensively in leading ABDC and Scopus indexed journals. Her work focuses on building future-ready organisations through reverse mentoring, employee engagement, job crafting and knowledge management behaviors. Known for her highly interactive and application-oriented teaching, she designs and delivers courses for MBA and executive audiences on themes such as organisational behaviour, organisational analysis & design, conflict & negotiation, engagement 2.0, and the science of happiness. As Programme Chair, she brings a research-driven, experiential, and practice-oriented approach that enables participants to translate insights into measurable workplace impact.
